Property Details

Casa Escondida, meaning “The Hidden House,” is a 3,500 sq. ft. private residence that lives up to its name; secluded, serene, and hidden in plain sight. Centrally located yet tucked into a lush hillside, this gated estate offers privacy without sacrificing convenience. Set on over one acre of land, the property features a paved and landscaped driveway leading to an enclosed entrance courtyard accented with architectural and evening lighting. A covered gazebo-style entry welcomes you into the main home, with an additional convenient access point through the mudroom/laundry area that connects directly to the kitchen. Upon entering through the custom solid-wood pivot door, you’re greeted by a bright, open-concept living space finished with Italian flooring, modern contemporary details, and high quality appliances throughout. The thoughtfully designed kitchen is ideally positioned near the entrance, making unloading groceries effortless.
