Property Details

It has an easement running through it. It is located in the Cima de Copey, Dota, a place with abundant biodiversity and beautiful landscapes, it also has a street frontage of approximately 200 m. The topography of the land is mostly flat to partially sloping, with slight slopes. The farm has a concession for the use of water from an adjoining stream, mainly for agricultural use, since to date this has been the economic activity that has been carried out on the property. In that locality, a drinking water supply project is being developed, so the property will soon have availability of said service for human consumption. Likewise, the electric light service is about to be installed, which is totally viable in the property because it is next to the public road, the latter being fully accessible.
